FINASTRA

A Corporate

Factsheet – Appzillon Corporate Mobile Banking for Fusion Corporate Channel

# Review and approve transactions, anytime, anywhere

Appzillon's Corporate Mobile Banking app makes it possible for time-pressed corporate treasurers and heads of finance to view and manage transactions securely via mobile devices.

" From their mobile devices, finance professionals can login, view, filter, approve and update the task lists of financial transactions across areas including cash and trade. "

The Challenge

The world of work has changed forever. Increasingly working remotely or on the move, finance professionals don't always have direct access to the systems and the teams they need to get things done efficiently. Yet corporations cannot function if essential management decisions and approvals that keep the business running smoothly cannot be made efficiently.

At the same time, rapid digitization has raised all stakeholders' expectations of the pace and speed of commerce. The challenge for corporates is to empower staff to execute critical decisions 24/7, wherever they are.

User dashboard & main menu

Key features

How it works

Appzillon Corporate Mobile Banking supports a wide range of digital banking operations across SME and corporate banking. From their smartphone, finance professionals can login, view, filter, approve and update task lists of financial transactions across areas including cash and trade. Users can add remarks whilst taking action, and either approve the task or return it to the initiator or previous approver. One Time Password (OTP) is included as second factor authorization to ensure security for task approval.

Navigating and using Appzillon Corporate Mobile Banking is easy and intuitive. Customers have great visibility into accounts, with the ability to search using a range of filters to create views of summaries, drill down into account details and retrieve historical statements. Dashboard views give quarterly and half-yearly overviews of existing accounts.

The solution is easy to personalize, enabling customers to maximize their efficiency.

As a platform solution with micro app architecture, Appzillon Corporate Mobile Banking is extremely flexible, making it easy for customers to add or modify features. And with single source code for multiple operating systems together with a comprehensive portfolio of widgets and charts, it can support a wide range of user experiences and digital channels. Built-in controls ensure robust security.

Appzillon Corporate Mobile Banking, pre-integrated with Finastra's FusionFabric.cloud, seamlessly interacting with Fusion Corporate Channel solution can be implemented in three to four weeks, for rapid launch. Its platform architecture ensures customers can stay ahead of the latest technology advances and integrations.

Approval screen and One Time Payment authorization

About Finastra

Finastra is building an open platform that accelerates collaboration and innovation in financial services, creating better experiences for people, businesses and communities. Supported by the broadest and deepest portfolio of financial services software, Finastra delivers this vitally important technology to financial institutions of all sizes across the globe, including 90 of the world's top100 banks.
