# Platform Spotlight

**Vincent Pugliese**

Senior Vice President &  
General Manager, Platform,  
Finastra

Welcome to the latest edition of the FusionFabric.cloud spotlight, aimed to keep you up to date with all of our essential platform news across technology, events, research and new launches.

As we come to the end of Finastra's financial year, it's time to look back at what we've accomplished, as well as what's to come. We all have experienced a rather significant disruption across every part of our day-to-day lives throughout the past year. That said, we're very proud of the work we've done to continue to support our clients through it all.

Last year, we took a huge step towards helping our clients get more value from their data with the launch of Fusion Data Cloud. We also hosted two incredible Hack to the Future Hackathons – Hacking for Good and Tackling Bias in Financial Services. We have also seen remarkable growth in our ecosystem, with an ever-expanding library of APIs, data sets, applications and customers coming together to unleash the full potential of cloud-enabled financial data.

As the world continues to embrace more digital ways of working, the time is now for our clients to tap into and realize the value of the FusionFabric.cloud.

## Pathways to competitive advantage in the era of digital transformation

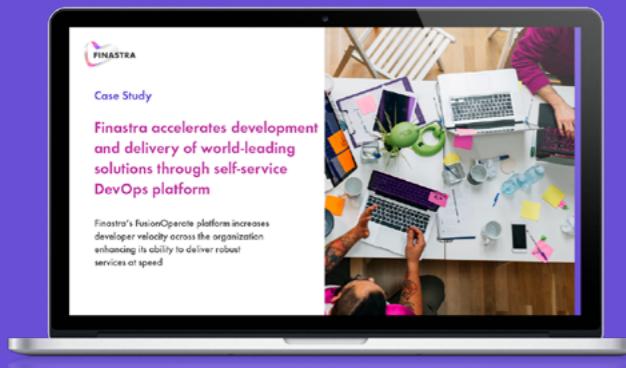

For financial services institutions who want to stay competitive, digital transformation is no longer a case of ‘if’ but ‘when’. This has been accelerated by digital adoption during the pandemic and growth in the fintech sector. However, without a robust strategy, digital transformation risks becoming a disconnected set of actions that wastes resources and falls short of targets. [Download this paper from Aite to discover the actionable pathways to competitive advantage in the era of digital transformation.](#)

## Latest platform thought leadership

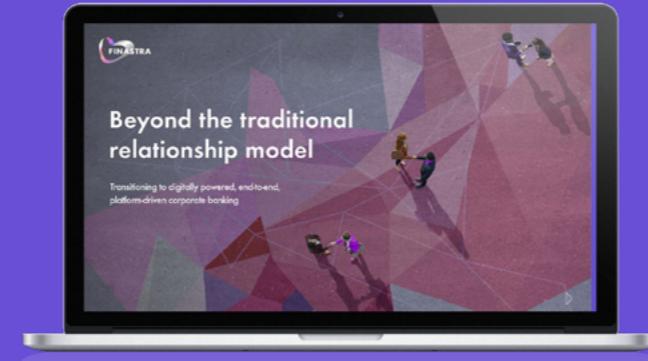

### Fusion Operate Case Study

Discover how FusionOperate DevOps platform increases developer velocity across organizations and how it enables the FusionFabric.cloud developer ecosystem to deliver robust services faster than ever.

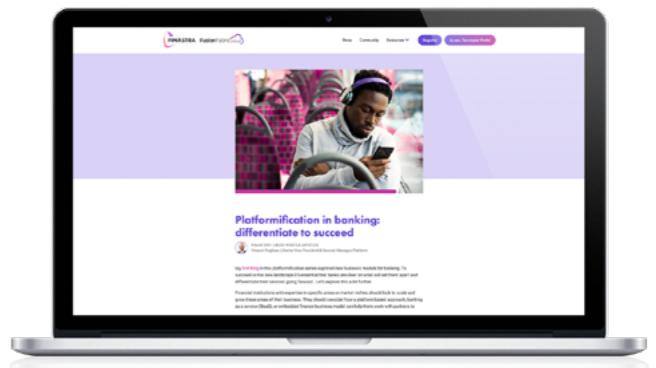

### Planning for the future. What's your 2025 Outlook?

Banks around the world are moving their focus from operating as traditional 'relationship builders' to being platform players. The opportunities are clear. But how can corporate and business banks evolve to seize these opportunities?

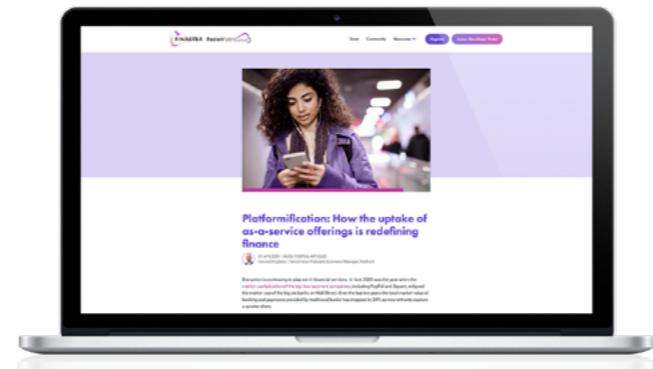

### Platformification in banking: differentiate to succeed

To succeed in the new platformification landscape, it's essential that banks are clear on what will set them apart and how to differentiate their services going forward.

### How the uptake of as-a-service offerings is redefining finance

Disruption is continuing to shake up the financial services market. To avoid disintermediation, financial institutions first need to realize and recognize the scale of the challenge.

## FusionStore

Finastra's FusionStore is bringing new fintech app innovations to Finastra's 9,000+ financial institution clients around the world.

### New apps launched

#### [Cybernance Platform](#)

The Cybernance Platform is a security governance solution that creates a structured way to mitigate cyber risk. Automating regulatory frameworks like FFIEC CAT, NIST CSF, and CIS 20 provides a shared view of risk and resilience and an efficient method for assessing, managing, and improving cyber risk, as well as complying with regulatory cybersecurity requirements.

#### [Smart savings](#)

Smart Savings utilize Open Banking to provide a state-of-the-art user experience for personalized savings, enable users to set up automated rules based on their spending behavior and link their savings to sustainable actions.

#### [Pre-integrated with Fusion Equation and Fusion Essence](#)

#### [ABAKA's AI-powered Next Best Actions](#)

ABAKA's AI-powered Next Best Action, is an AI-recommendation engine helping Financial Institutions deliver a hyper-personalized engagement to their customers and build a truly customer centric ecosystem across their range of products and services.

#### [Pre-integrated with Fusion Equation and Fusion Essence](#)

#### [ENACOMM EFS IVR](#)

ENACOMM EFS-IVR is the industry leading IVR solution for Credit Unions, Community Banks, and FIs. It is a flexible IVR solution that offers the best customer experience.

#### [Pre-integrated with Fusion Digital Banking](#)

#### [Mobile Banking Keyboard](#)

Mobile Banking Keyboard provides instant access to mobile banking services within everyday social interactions in any mobile app. The solution allows customers to easily access a range of services including peer-to-peer (P2P) payments, account balance & information checks, and bill payments all through the mobile keyboard in the flow of daily conversations.

#### [Pre-integrated with Fusion Digital Banking](#)

### [OneSpan Fusion Multi-Factor Manager](#)

### [Symantec Fusion Multi-Factor Manager](#)

Fusion Multi-Factor Manager is a multi-tenanted multi-factor authentication API service that integrates with multiple providers, supporting different authentication standards. It offers consistent APIs across multiple MFA providers, enabling banks and fintech applications to switch between the providers with minimal changes. Fusion MFM has incorporated OneSpan or Symantec VIP Access® (Hard and Soft Tokens).

### [trace:original](#)

Begin your journey in digitizing and managing your negotiable instruments or documents of title, without the need for a central registry or document repository. Enigio trace:original uses distributed ledger technology (DLT) to create an authoritative digital original document with distinct ownership rights.

#### [Pre-integrated with Fusion Trade Innovation](#)

## Lending

### [HUBX Arranger](#)

HUBX Arranger delivers simplified and scalable processing to the loan syndication process. HUBX Arranger enables front office teams to run every deal digitally, track all the latest loan positions and seamlessly sync data with the firms back-office teams to reduce operational risk and cost, freeing up the business to focus on high-value deals.

#### [Pre-integrated with Fusion CreditQuest](#)

### [Fusion Rapid Fin Pay](#)

Designed for small to medium sized businesses (SMBs) in the USA to ease their payment initiation with their bank. With easy and intuitive browser-based application and on-screen validations to ensure payment is well formatted to reduce the risk of returns and rejects by banks.

**Pre-integrated with Fusion Global PAYplus**

## Treasury and Capital Markets

### [LIBOR Express](#)

Libor Express is a Software-as-a-Service based solution, combining the quantitative computation and simulation power of Fusion Summit, with visualization through Summit Insight, PowerBI and FusionFabric.cloud. It was developed as a LIBOR Replacement Simulation Tool for Fusion Summit by GreenPoint.

**Pre-integrated with Fusion Summit**

### [Straterix Scenarios](#)

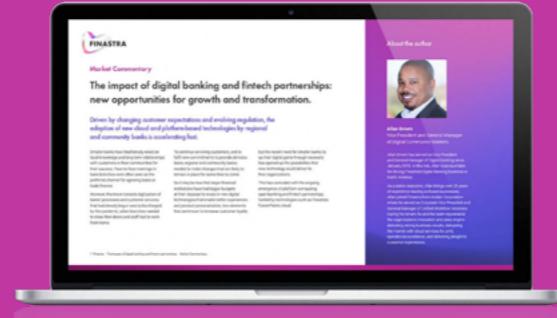

Straterix Scenarios is a ML-powered SaaS solution that automatically generates baseline and stress scenarios for ECL (Expected Credit Loss) calculations (CECL/IFRS 9) and projects balance sheet and income statement items. It supplies data to Fusion Optimum for rendering results and generating reports.

**Pre-integrated with Fusion Risk**

## Bank and fintech partnerships – the way forward?

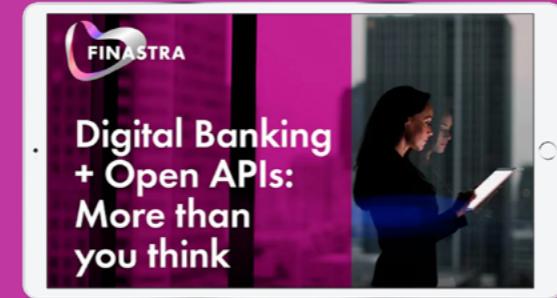

The impact of digital banking and fintech partnerships: New opportunities for growth and transformation

Find out how the adoption of new cloud and platform-based technologies by regional and community banks is accelerating fast.

How do you make a difference and give account holders a leg up in a complex, fast-moving world with increasing pressures and responsibilities?

Find out how you can go beyond the usual digital banking expectations by leveraging Finastra's open app ecosystem.

How banks and fintechs are learning to move fast, delight customers and innovate in today's API-enabled economy

The world of payments is changing rapidly. For banks, embracing collaboration is now being seen as an essential approach to meet customer expectations and drive.

Using AI and ML to detect and prevent money laundering and fraud in banking

Discover how Finastra, along with partners NetGuardians and ComplyAdvantage, built a highly effective AI-powered fraud and crime prevention solution and integrated it with the core banking platform to provide next generation security.

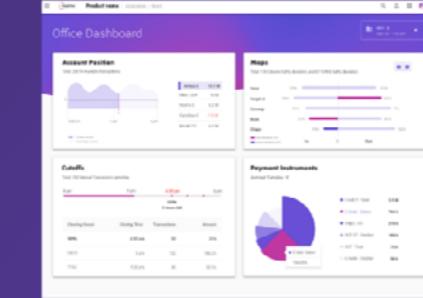

# Developer experience updates

## What's new for app creators

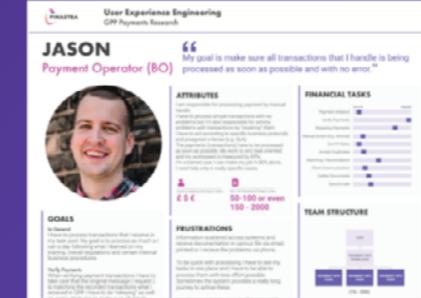

### Wizard documentation

This new pattern simplifies tasks by cutting them into smaller ones.

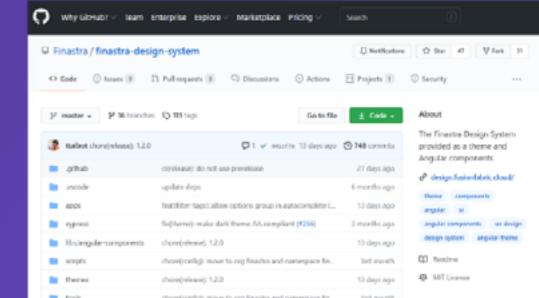

### Payments dashboard

Build financial dashboards easily with our design system, leveraging persona and user flow data coupled with high fidelity designs.

### Also

- Design UI kit available for Adobe XD (including foundations, components and app starter kit)
- Dark theme accessibility improvements: WCAG AA level
- Website search improvements
- Support for Angular 11

### Release v1.2.0 (GitHub)

Stable release v1.2.0 of design system libraries (theme and components)

# Hack to the Future

Build an unbiased fintech future  
4 Mar – 4 Apr

Launched to help build an unbiased fintech future, the third edition of our global hackathon saw over 600 participants from more than 50 countries, including Antarctica. With many women-led and diverse teams of students, fintech enthusiasts, financial institution developers and fintech founders all joining the movement, the hackathon is a step towards positive change and a brighter future for finance.

We made our open development platform – FusionFabric.cloud, underpinned by Microsoft Azure – along with more than 180 APIs, SPIs and data sets available for the hackathon.
