

2021

Quarterly Platform Spotlight

Vincent Pugliese

Senior Vice President &
General Manager,
Platform, Finastra

Welcome to our latest Platform Spotlight, bringing you the latest news on our essential platform updates across technology, events and new launches.

It's been another busy quarter as we continue to make significant updates to our FusionFabric.cloud platform capabilities.

In his latest blog, Head of Product Management, Grégory Cobena, shares exciting changes to the try and buy functionality on the FusionStore. He also discusses the introduction of personas, that will enable us to tailor the app purchase journey to distinct roles within banks and organizations.

We've continued to innovate during this quarter, with the announcement of two exciting crypto partnerships that will enable us to offer crypto wallets to our community markets clients. We will be experimenting with different commercial models for each of the two apps.

We're also delighted to have won 'Best Findability' at this year's Dev Portal Awards. The jury highlighted that Finastra's FusionCreator Developer Portal sets itself apart by its consistency: "The flow visualized on the home page is aimed at quickly and easily finding what you need... Of greatest value to a visitor is that you can easily re-find something with their consistent framework."

And finally as we enter into Q3, Finastra Forum is coming – these will be our first in-person customer events since the pandemic started, slightly scaled down versions of the "Finastra Universe" events many will be familiar with but will be broadcast live for all. Keep your eyes out for an invite!

I hope you enjoy this bulletin. As digital ways of working and finance continue to increase, I'm sure we'll have more good news to share in our next issue.

Platform thought leadership

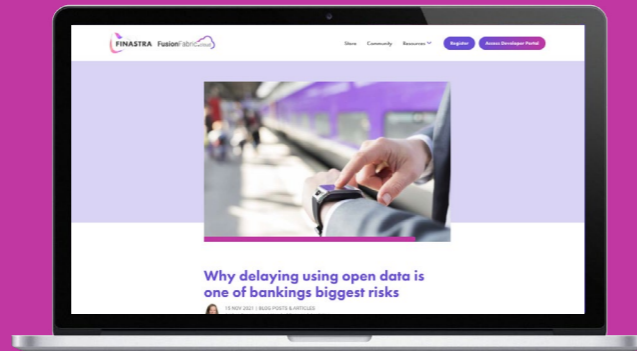

5 Tips for Success with Data Insights

In this latest blog, Vincent Pugliese, SVP and GM, Platform at Finastra, looks at how cloud, platforms and open APIs are creating a new world of opportunities for financial institutions on how they can benefit from data.

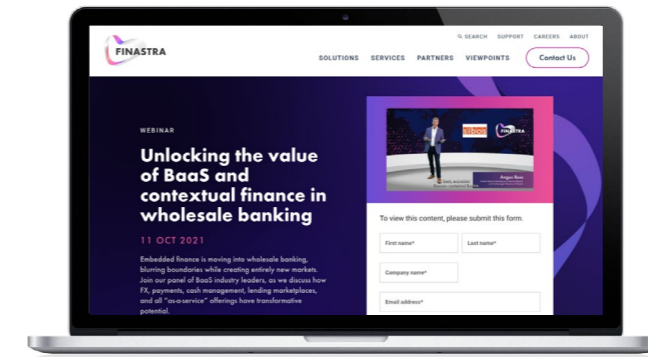

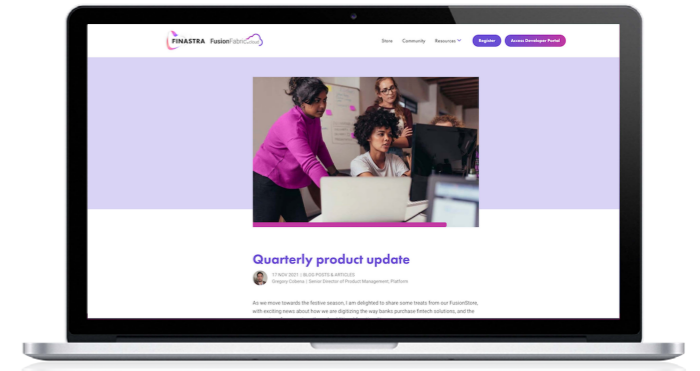

Why delaying using open data is one of bankings biggest risks

Financial institutions that are not yet embracing open data as a key component of their strategic plan may already be lagging behind as Amber Sappington, Finastra's Head of Data & Analytics discusses in this article.

Try and Buy Live on the FusionStore

In his latest product update, Head of Product Management, Grégory Cobena, shares the exciting new try and buy functionality on the FusionStore. He also discusses the introduction of personas, that will enable us to tailor the app purchase journey to distinct roles within banks and organizations.

Embedded Finance Insights from Sibos

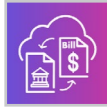

Embedded finance is moving into wholesale banking, blurring boundaries while creating entirely new markets.

Join Finastra's panel of BaaS industry leaders, as we discuss how FX, payments, cash management, lending marketplaces, and all "as-a-service" offerings have transformative potential.

FusionStore

New apps launched

Consumer Banking

Fusion Virtual Accounts

To respond to an increasingly competitive market for cash and liquidity, in parallel with a surge in corporate demands, improve your cash management offering to customers, with an integrated virtual accounts solution.

Pre-integrated with Fusion Cash Management

Fusion Phoenix SMS

Fusion Phoenix SMS helps financial institutions use digitalization to better meet customer's needs by enabling customer text communications within the Phoenix core banking solution

Pre-integrated with Fusion Phoenix

Fusion Phoenix OTP

Fusion OTP allows Customer Service Representatives to leverage Phoenix to securely verify the account holder's identity by generating a one-time secure passcode and sending that code to the customer's mobile number for voice verification.

Pre-integrated with Fusion Phoenix

CECL Express

CECL Express is turnkey, as-a-service solution that takes the complexity out of understanding and complying with the new CECL standard issued by the Financial Accounting Standards Board. Furthermore, CECL Express helps you to counter the large increase that CECL is predicted to have on capital requirements.

Pre-integrated with Fusion Phoenix, Fusion UltraData

Elle

Elle sits on top of the Fusion Mortgagebot platform and allows lenders/bankers to easily connect and communicate with applicants at any stage of the loan process from looking-to-booking, 24/7 using text messaging.

Pre-integrated with Fusion MortgageBot

Modefin OEBP – Mobile Wallet

Modefin's OEBP – Mobile Wallet is a robust, secure and well-integrated mobile platform and payment solution that helps to achieve improved payments, and enhanced service delivery. Supports QR code, ID-based, and card-based merchant payments.

Pre-integrated with Fusion Equation, Fusion Essence

Planto PFM & Personalized Banking Platform

Planto's PFM & Personalised Banking Platform enables Financial Institutions to launch PFM based banking propositions and personalise interactions with their digital banking customers powered by transaction data enrichment & contextual data.

Platform & Innovation thought leadership from across Finastra

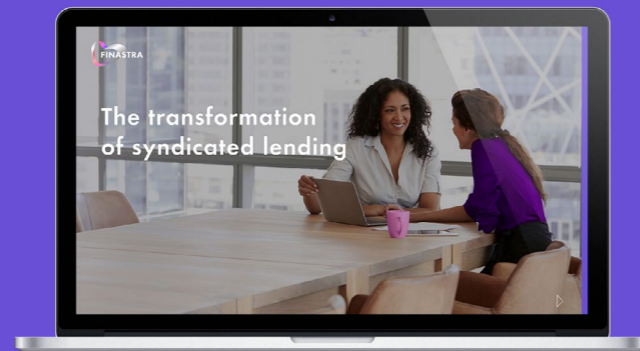

Unlocking the value of data in payments

Whilst data is king – not all data is created equal: Dive into the importance of cross-functional collaboration to the role data can play in protecting customers from fraud as well as how banks can leverage their payments data to increase efficiency and build revenue streams.

The Transformation of Syndicated Lending

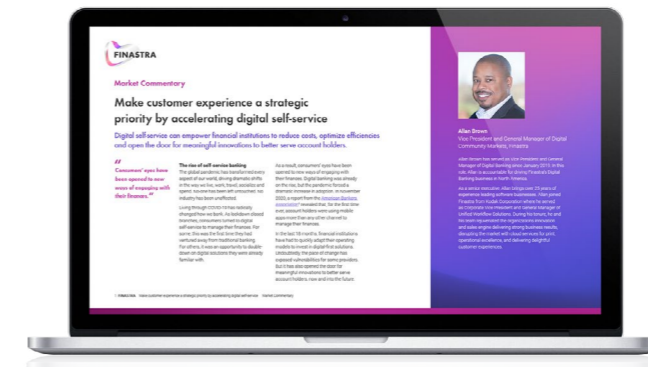

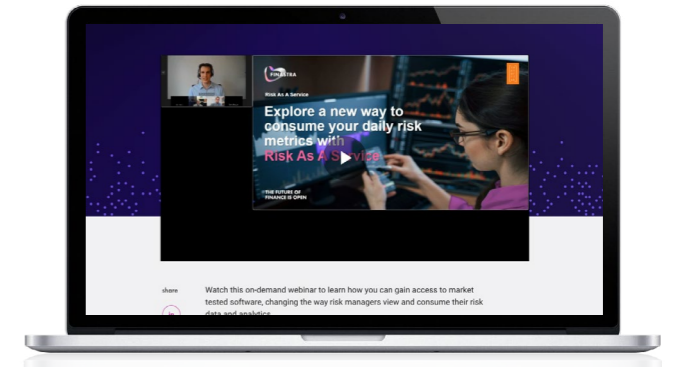

Despite a temporary slowdown in early 2020, the outlook for the syndicated lending market remains strong. Read on to learn some of the insights revealed as Eyal Altaras, Director of Global Solution Consulting at Finastra and Axel Coustere, co-founder HUBX, collaborated to deliver market intelligence from a combined total of over forty years of industry experience.

The transformation of syndicated lending

Explore a new way to consume your daily risk metrics with Risk-as-a-Service

On-premise risk calculations can be time-consuming and expensive, often requiring long implementation projects before value can be realized. Subscribing to flexible, cloud-based software with reliable and quick to retrieve data, provides access to risk measures in days to ensure compliance with all the most recent regulations..

Make customer experience a strategic priority by accelerating digital self-service

Digital self-service can empower financial institutions to reduce costs, optimize efficiencies and make customer experience a strategic priority. The bar for digital self-service is rising higher every day. Consumers are becoming increasingly used to their idea of a financial institution as an app rather than a building.
