

Factsheet – Beauceron Security Awareness Training & Phishing

An automated platform that positively changes behavior, reduces cyber risk and increases cybersecurity awareness

Leverage the automated cybersecurity platform that combines phishing simulations, cyber awareness training and customizable analytics to empower behavior change across organizations.

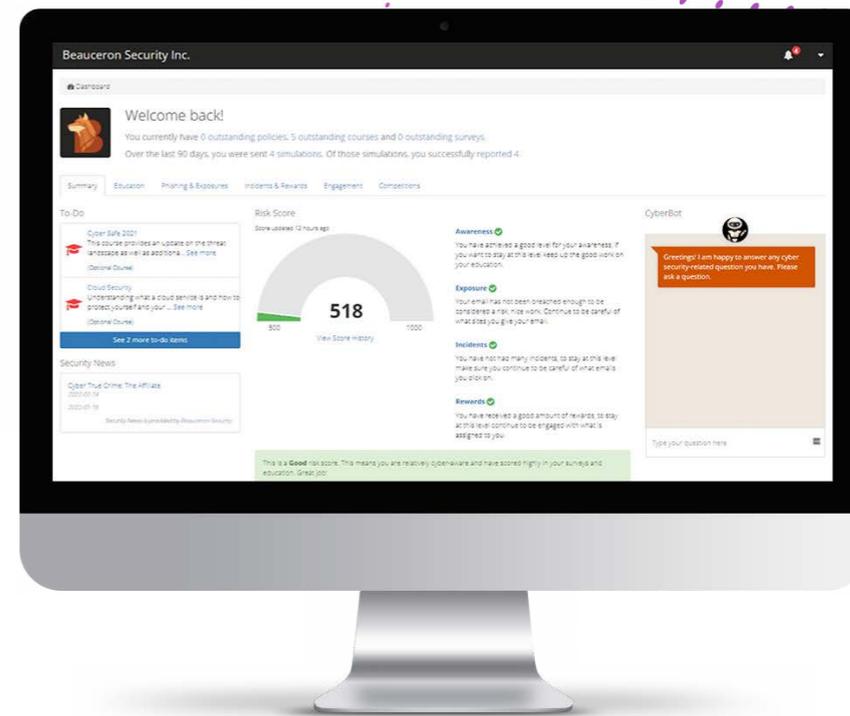

//
The tool has more than paid for itself in the reduction of resource hours and the multiple tools it has displaced, plus it allows people to do the jobs they are supposed to be doing, instead of running all the functionality in the background and aggregating the data."

Senior Manager

Awareness & Education, Global Cyber Security Fortune 500 Financial Institution

The volume of phishing attacks doubled in 2020 with cybercriminals posing as trusted vendors, co-workers or brands. Security teams can't keep up, leading to untrained employees and security incidents. Regulators now require banks to train employees on cyber risks, while insurance companies will not provide services to organizations that don't offer training. Additionally, 85% of consumers will not do business with a company that has had a recent breach, highlighting the lasting impact on a brand.

Considering that 95% of breaches occur due to cyber attacks that attack people, organizations are now implementing tools such as Beauceron Security's platform as a part of their recovery plan to prevent future breaches. The automated platform combines phishing simulations, cyber awareness training and customizable analytics to positively change behavior across organizations.

Dashboard shown above

How it works

Last year, 95% of breaches came from a phishing or social engineering attack. Beauceron Security empowers behavior change across organizations by providing the right information at the right time, enabling individuals to make better decisions. The Beauceron Security Awareness Training & Phishing app provides a unique integrated and highly automated platform that combines phishing simulations, cyber awareness training, surveys and other relevant content with advanced analytics and dashboarding.

Impactful automation lets financial institutions run their cybersecurity awareness program without an extensive time commitment, allowing the security team to leverage their expertise, to focus only on the real threats. The Beauceron Security Awareness Training & Phishing app offers customizable and highly focused security training designed and written by security experts. It further enhances user engagement through gamification with personalized dashboards, risk scoring and competitions to incentivize good security behavior and help every team care more about cybersecurity. Advanced customizable reporting provides a detailed analysis of the financial institution's categories of phishes, the click-through rate and reporting rate with the ability to drill down further based on individual or division.

Beauceron Security Awareness Training & Phishing app is a cloud-based SaaS cybersecurity awareness and phishing solution that can be used by any Finastra customer, regardless of core or current IT infrastructure.

Why Beauceron Security Awareness Training & Phishing?

Completely automate the cyber awareness program with adaptive phishing, removing the need to manually schedule campaigns and assign remediation paths.

Streamline compliance requirements without compromising results. Effortlessly meet compliance with surveys, educational experiences and simulations.

Enhance engagement with personalized dashboards, risk scoring and competitions to positively incentivize good security behavior and help security teams care more about cybersecurity.

In just 90 days, platform users experienced an 85% decrease in phishing simulation clicks, 99% increase in emails reported and 11% decrease in ignores.

Key benefits

Reduce risk

Manage and reduce the risk of a data breach, ransomware, regularity non-compliance and reputational loss in real time.

Reduce cost

Reduce the likelihood and need for incident investigations, while alleviating fines, insurance premiums and ransom payments.

Improve efficiency

Reducing IT time spent managing security programs by 75% and automating the report generation enables process optimization and improves efficiency. In only 90 days reduce phishing clicks by 85% and phishing reports by 99%.
